RE: Stop BioPEEP

It is with great urgency that we are contacting you. We have received frightening information about the abuse of genetic engineering by specific governments and multinational corporations.

The attached press release will provide additional information. Please also check our Web site at <http://www.stopbiopeep.com> for conclusive documentation of these abuses.

We are an international grassroots organization, based in Brisbane, Australia, with supporters around the world, committed to preventing the use of a technology which has no purpose other than exploitation and eradication.

Please help us STOP BioPEEP!

Thank you.

Prevent Experimental Eugenics on People!
